

Mahindra World City, Chennai

Based on the every careful efforts taken to develop such innovative product, it is evidenced that A' slab is a newly developed high quality surfacing material, It is created by clubbing of the essential properties of specific colours, high quality of surface finish for aimed texture, excellent physical strength value for wear resistance, compressive strength for crack free surface, stain free nature in surfacing, long lasting quality with less maintenance and good appearance, suitable to pave in premier streets. It has to be act as a versatile tool for designers endless innovation for surfacing of streetscaping.

High Quality Surface Materials  
for Streetscaping

*We Cordially invite you to our Stand Number J 35  
in Hall 1*

*@ Exhibition Innoprom - 2016  
#2 Expo Boulevard  
Ekaterinburg, Russia*

We, Aathees Hard Flooring, design surfacing for urban streets and carriage way . We study the challenges and innovative solutions set forth by urban street planners in terms of long lasting quality , colouring and texturing of surfacing to achieve the world class street and carriage way.

We innovatively implement their principles and concepts of surface planning in urban footways, pedestrian crossing, shared surface of carriage ways.

For Example,

- de cluttering the road marking lines and provide appropriate coloured and textured surfacing to convey the principles of movement to the users effectively.

- enhance the psycholigical calming effect by using improved surfacing materials with impressed colours and purposeful textured .

Based on the designer 's concept , we design and manufacture the surfacing materials for the world class streets and carriage ways to perform in various aspects .

- better visibility ,
- clear functional movements of fit for purpose,
- convey the message of principles of movement,
- physical surface structure for achieving : Safety , Directness , Comfort , Coherence , Attractiveness and Adaptability

Thus it is resulted to delivering the high quality infrastructure .

We have had complete instrumented infrastructure to develop the innovative products and hi-tech machines to manufacture the high quality surface materials - paved in world class streets and carriage way.

Thus it is resulted to impressive , long lasting life and zero maintenance cost of surfacing materials to world class streets and carriage way .
